DESCRIPTION & ACCREDITATION

Established in 2010, the master program on Tourism Planning is aimed at accumulating knowledge and experiences through researches as well as lesson learned from cooperation with many local governments and central government. The subject gradually attracted interest of students from planning department as well as from other fields of study

Accreditation: A (BAN PT)

PROGRAM OUTLINE

With the increasing strategic position of tourism in the national development agenda, the program will be appropriate for faculty members of the many tourism management school, as well as planning school. The program is also beneficial for those who are starting a career at the provincial as well as local (Kabupaten and Kota) government. In addition, there is also an increasing need for consultancy services with regards to tourism planning, in line with the fact that tourism is becoming an interest for many if not all provincial and local government. Tourism planning at different levels of government are required by law (UU-RI No. 10 Tahun 2009).

Students of Tourism Planning are required to attend classes, as well as being exposed to the real problems that have to be solved in planning studios. Students will also be given the opportunities to attend elective courses offered by other related study programs: regional and urban planning, architecture, urban design, and transportation planning
