

## DESCRIPTION & ACCREDITATION

The Master Program in Architecture provides students with the opportunity to develop advanced knowledge and skills for professional practice in the public as well as private sectors and in academic domains. It allows students the opportunity for in-depth study in fields of architectural design and research.

Accreditation: A (BAN PT) and International Accredited by KAAB (Korea Architecture Accrediting Board).  
[www.kaab.or.kr](http://www.kaab.or.kr).

## PROGRAM OUTLINE

Graduates of this program are employed in a wide range of consultant offices, government and non-government organizations, as practitioners, managers, researchers and policy makers. Some graduates use this qualification as a basis for entering private practice.

The curriculum for graduate degree programs are developed as an integrated structure, taking into consideration the following aspects:

- The development of professions in field of architecture.
- The development of architecture as a scientific discipline.

The philosophical underpinning of curriculum are: Life-long Learning, Knowledge-based Learning, and Student Centered Learning.

The Graduates of the program are expected to be professional, practicing architects and/or development practitioners who have wide knowledge in architectural design and built environment issues.
